# USER MANUAL

DSM

Before you start to read this manual, thank you very much for using our **Delta Search Machine**.
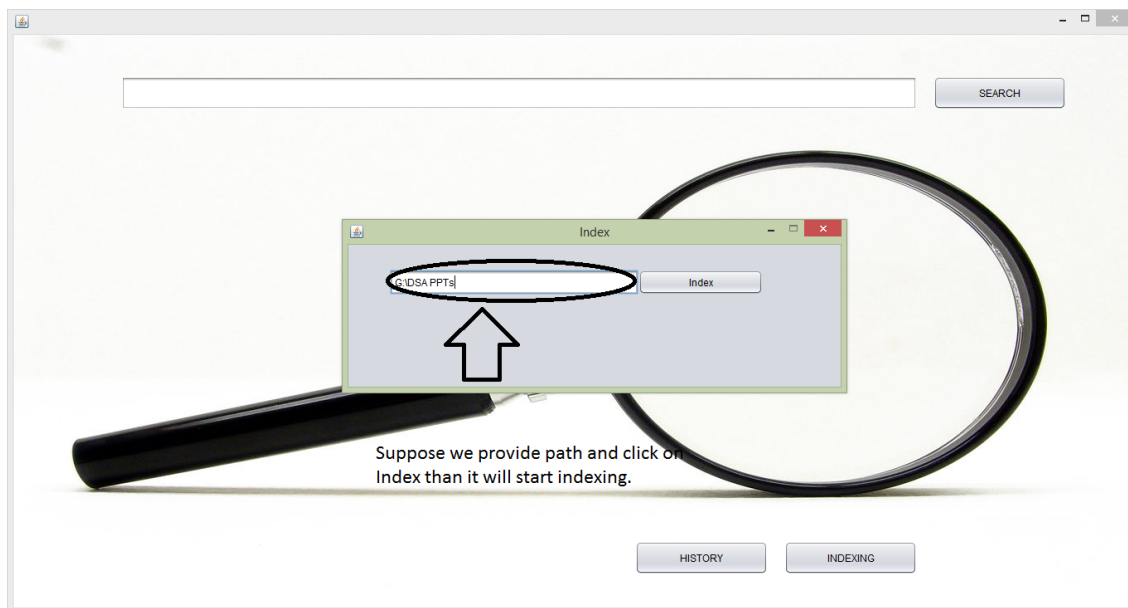

How to Use?-

1).This is your main Screen:-

Then :-

2).First of all Click **INDEXING** button, you will see like this:-

This will need path for Indexing a
folder to index it's files.

If you click on
index than new
popup window
will open.

Suppose we provide path and click on
Index than it will start indexing.

Now, enter the folder path that you want to index and click index, so that we
can search fast from that folder. Wait for 2 minutes because indexing takes
some time. We recommend indexing your pc every two weeks.

3).Now close that indexing window, type your query into the search box and click search to search files.

After Indexing it will able to suggest and search a word for searching.

4).You can click history button to watch your search history.

After all the values(10) are filled with values than if we add new value the first value is discarded and new values is added at the end of the list.

5).We also give auto correct feature and recommendation features for you convenience.

6).So enjoy our product, it's that easy to search.....
